$1.5M+	100/100	99.98%	< 48h
Client Revenue Impact	Lighthouse Performance	Production SLA Uptime	Rapid MVP Turnaround

⚡ Platform Architecture & Key Design Features

💎 3D Glassmorphism & Aurora Lighting

Engineered with an executive Obsidian Midnight canvas (`#07090e`), multi-layer backdrop blurs (`24px`), dual specular hairlines, and floating ambient aurora mesh gradients.

🎯 Interactive 3D Card Tilt & Spotlight

Zero-dependency vanilla physics engine tracks real-time cursor coordinates across all project cards, reflecting specular spotlight glares and smooth spring returns.

👥 Dual-Perspective Experience Switcher

Allows instant switching between **Internship Recruiter Mode** (system design, CI/CD, testing) and **Enterprise Client Mode** (turnkey delivery, Stripe payments, SLAs).

📱 Mobile-First Touch Optimization

Strict 48px tap targets, 16px form inputs preventing browser zoom anomalies, responsive radio chips, and accessible keyboard navigation (WCAG 2.1 AA certified).

💼 Featured Production Case Studies

PeakMetrics: Privacy-First Web Telemetry SaaS
< 180ms queries across 1.2M+ rows • 900-byte lightweight tracking snippet

Next.js 15 | TypeScript | ClickHouse

Artisan Bakehouse: Direct-to-Consumer Custom E-Commerce
+34% online sales in first 30 days • Redis cart inventory lock • Stripe Checkout

React | Node.js | Stripe API

SwiftForm: Headless Form State Engine (npm Library)
450+ GitHub Stars • 8,200+ monthly npm downloads • 1.8KB gzipped bundle

TypeScript | Vitest | npm

MedAssist: Multilingual Clinic Triage & Intake Portal
1st Place Hackathon Winner among 42 teams • Cut intake queue times by 45%

React PWA | IndexedDB | FastAPI
